

User Guide for SD Card Update

1

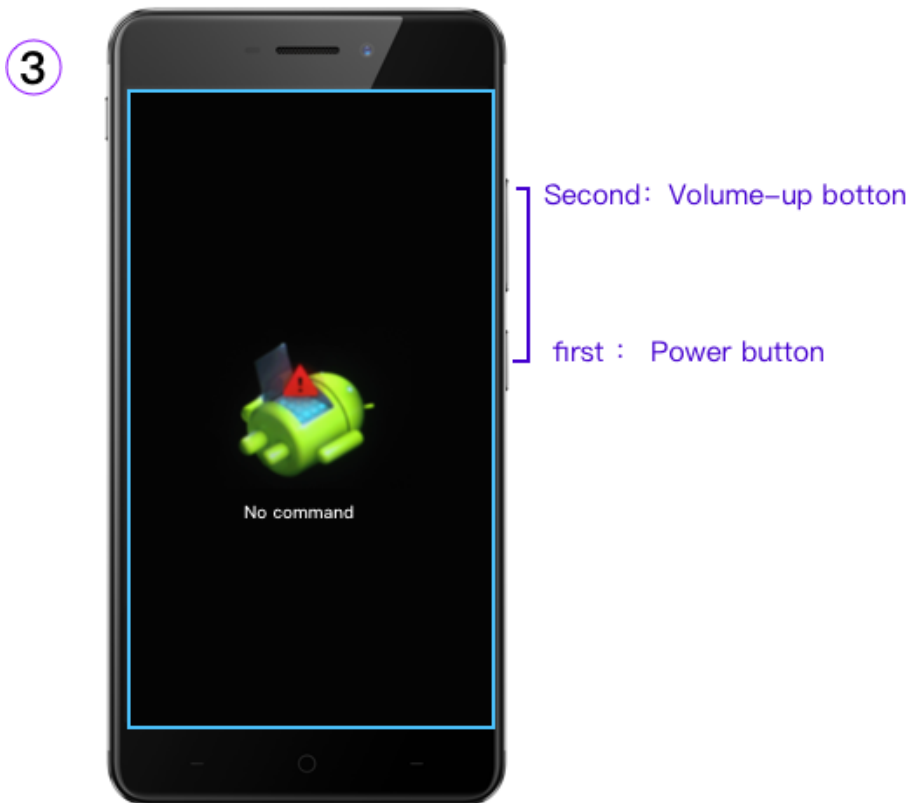

1. On the official website (<http://www.neffos.com/en/product>), download the complete update package “xx_update .zip” of the corresponding phone model to SD card.

2. Press and hold the power button to turn off the phone and then insert the SD card.

2

3. Press and hold the Power button and Volume-up button at the same time to enter the “No command” page.

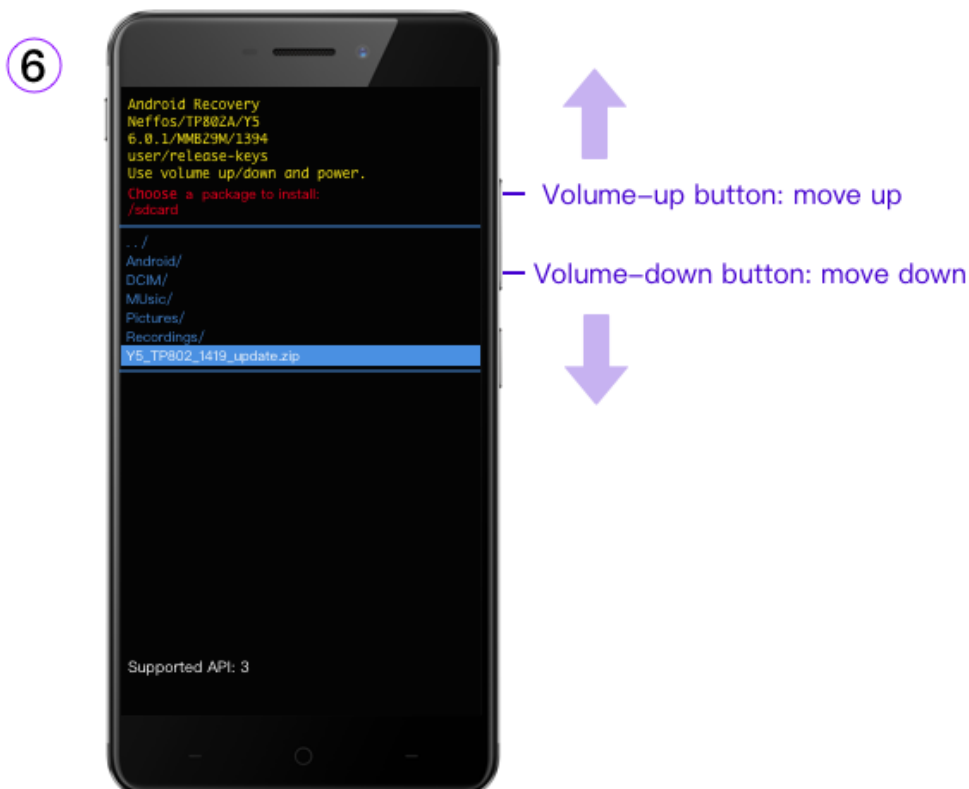

4. On the “No command” page, first press and hold the Power button and then quick press the Volume-up button to enter the recovery page.

5. On the recovery page, use the Volume-up/down key to select the “Apply update from SD card” items.

6. After confirming, press the Power button to enter the “Choose a package to install” page.

7. In the SD card, use the Volume-up/down key to select the complete update package “xx_update .zip” file. After confirming, press the Power button to enter the installation update.

8. When the installation is complete, select “Reboot system now” to restart the phone or “Power off” to shut down and exit the recovery page.

9. Upgrade completed.
